Our services

ERP

Intellicon offers an array of Enterprise Resources Planning Advisory Services that assist clients with essential efforts to adequately plan for monitor,

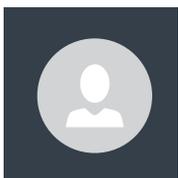

and manage ERP projects to fully leverage their transformational potential. Our advisory services span the entire ERP lifecycle from initial project inception to post-implementation assessment.

ECM

Enterprise Content Management coordinates data management projects and service development effort across the organization. As a result, it

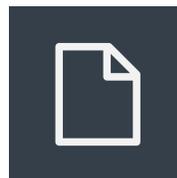

drives better data management projects to have higher success rate, deliver more value, and reduce time to deliver and cost to implement.

CRM

intellicon maintains a team of highly skilled consultants through its Consulting Department for Customer Relationship Management software. Our

consultants not only deliver the best implementation and training services, but are also available to provide specialized services after the initial implementations.

ENTERPRISE MOBILITY

Intellicon is helping enterprises achieve the best of their investments in Mobile Strategy, we enthusiastically become integral part of our client's digital strategy

and participate in designing our client's digital strategies, develop them with attention to detail, test them like a power user, deliver it and support client when required.

BUSINESS INTELLIGENCE & ANALYTICS

Intellicon offerings enable enterprises to equip their decision-makers with the right information at the right time in

the right context to significantly improve the quality of decision-making. We offer complete Business Intelligence & Analytics programme from strategy to execution.
